Course Description:

Mindfulness has been shown to have a positive impact on brain functioning and psychological well-being. How this is embodied in counselling remains a challenge for many. You will have the opportunity to explore mindfulness and compassion practices for yourself and learn strategies on how to help clients use mindfulness practice for self-management. The characteristics of mindfulness-based counselling are being centered in the present moment and a radical friendliness, acceptance, and compassion to all experiences. You will gain deeper understanding of the relevance of mindfulness practice in the quality of your work with others, its usefulness in cultivating therapeutic presence and empathy, and develop greater experience in both personal and professional applications of mindfulness practices.

Course Goal(s):

At the end of this course, participants will be able to use mindfulness practices to develop greater understanding of your own personal mental activity and functioning and learn strategies on how to incorporate mindfulness-based interventions in your clinical work.

Learning Outcomes:

Upon successful completion of this course, the learner will be able to:

1. Develop skills to benefit their own and their clients' mindfulness practices through experiential learning techniques
2. Bolster their ability to be present with themselves and their clients in order to increase empathy and compassion
3. Help clients identify and manage negative thought patterns
4. Reduce anxiety and stress
5. Create integration between mind, body, and spirit
6. Help clients improve awareness, see the benefits of acceptance, worth, and confidence
7. Increase feelings of harmony and connection
8. Help clients recognize and observe their body's responses with greater awareness

Course Topics/Content:

- Mindfulness and psychological healing.
- Contemplation and Meditation practices.
- Mindfulness skills and affect tolerance.
- Acceptance and sustained well being
