You asked for it, and now you have it! Many of our faithful readers have been asking if Library News is available on the Internet. We’re pleased to announce that now it is.

Simply point your browser to www.jibc.bc.ca/about/f-library.html and click on Library News. When you click on Current Issue your Adobe Acrobat reader will open up a copy of Library News that looks just like the one we send to you in the mail.

You’ll notice that there’s also an Archive for past issues of Library News. So if you’re trying to locate an item that you saw in a previous issue, you’ll be able to access that at your fingertips, as well. The Archive will grow as we continue to co-publish Library News on the Internet in addition to the familiar paper version.

If you’d like to help us save the paper, postal and labour costs involved with sending Library News the traditional way, please let us know. Feel free to phone 604-528-5599; send a fax to 604-528-5593, or send an e-mail to library@jibc.bc.ca to tell us that you’d like to be taken off our Library News mailing list - because you’ll be reading it on the Internet.

CHILDREN OF DIVORCE

CORRECTIONS

The Effects of Prison Sentences on Recidivism by Paul Gendreau, Claire Goggin & Francis T. Cullen. Ottawa, Ont.: Solicitor General Canada. (HV 8708 G454 1999)

EMERGENCY MANAGEMENT

Establishing a Relationship between Alcohol and Casualties of Fire prepared by TriData Corporation. Emmitsburg, Md.: United States Fire Administration, National Fire Data Center. (TH 9146 E877 1999)

MANAGEMENT

101 Ways to Make Meetings Active: Surefire Ideas to Engage Your Group by Mel Silberman. San Francisco, Calif.: Jossey-Bass/Pfeiffer. (HF 5734.5 S568 1999)
MANAGEMENT (Cont’d)

POLICE

OMGs in Canada and Around the World. Ottawa, Ont.: Royal Canadian Mounted Police Headquarters. (HV 6437 O443 1999)

RESCUE

Lost Person Behaviour by Kenneth Hill. Ottawa, Ont.: National Search and Rescue Secretariat. (HV 660 H545 1999)

TRAINING

How to Teach Adults by William A. Draves. Manhattan, Kan.: Learning Resources Network. (LC 5215 D73 1997)

Teaching at a Distance: A Handbook for Instructors by Mary Boaz. Mission Viejo, Calif.: League for Innovation in the Community College. (LC 5800 T423 1999)

What Every Manager Should Know about Training: An Insider’s Guide to Getting Your Money’s Worth from Training by Robert F. Mager. Atlanta, Ga.: Center for Effective Performance. (HF 5549.5 T7 M227 1999)

VALUES

VICTIMS OF CRIME

Responding to Hate Crime: A Multidisciplinary Curriculum for Law Enforcement and Victim Assistance Professionals by K.A. McLaughlin. Newton, Mass.: National Center for Hate Crime Prevention, Education Development Center, Inc. (HV 6773.5 R484 2000)

Games to Play with Babies by Jackie Silberg. Beltsville, Md.: Gryphon House. (GV 1203 S536 2001)

Games to Play with Toddlers by Jackie Silberg. Mt. Rainier, Md.: Gryphon House. (GV 1203 S537 1993)

Games to Play with Two Year Olds by Jackie Silberg. Beltsville, Md.: Gryphon House. (GV 1203 S538 1994)

BOOKS

Forensic Interpretation of Glass Evidence by James Michael Curran, Tacha Natalie Hicks, and John S. Buckleton. Boca Raton, Fla.: CRC Press. (HV 8077.5 G5 C877 2000)

Forensic Radiology by B.G. Brogdon. Boca Raton, Fla.: CRC Press. (RA 1058.5 B76 1998)

An Introduction to Forensic DNA Analysis by Keith Inman and Norah Rudin. Boca Raton, Fla.: CRC Press. (RA 1057.55 I56 1997)

Tire Imprint Evidence by Peter McDonald. Boca Raton, Fla.: CRC Press. (HV 8077.5 T57 M33 1993)
The Library has recently acquired six videos in the Changing Earth series. This series of videos was originally shown as the “Living with Violent Earth” series on Icelandic TV in 1988-1989. It has gone through several changes since then, according to its writer and presenter Dr. Gudmundur Sigvaldason. This version of the series was produced by the Barr Media Group and distributed in Canada by International Tele-Film. It has been cleared for use in B.C. educational institutions by AEMAC (Advanced Education Media Acquisitions Centre) and distributed by Learning Connection. And in case you were wondering, it is in English.

The objective of accurate forecasting is to enable people to live with volcanic eruptions, such as: gathering data by surveying the movement of the earth’s crust, monitoring seismic installations, and investing in research and observatories.

Preparing for Volcanoes & Earthquakes (V2515) presents documentary footage of the aftereffects of volcanic eruptions and earthquakes in various areas of the world. This 16 minute video discusses the following ways to prepare for such major disasters: fund existing monitoring stations, research and observatories; gather and disseminate factual information based on scientific surveys; and create an emergency management system.

Earthquakes (V2516) presents documentary footage of the aftereffects of earthquakes in various areas of the world. It serves to underline the vulnerability of urban centres. This 20 minute video defines “earthquake” and discusses types of earthquake waves (primary, secondary, longitudinal); explains the Richter and Mercalli scales; and suggests creation of earthquake prediction programs to detect earthquake precursory signals.

Volcanoes (V2517) shows the aftereffects of volcanic eruptions in populated areas and serves to underline the need for expert knowledge and modern technology to predict these natural disasters. This 23 minute video explores the conditions for volcanic eruptions and phases of volcanic activity (vulcanian, peleean); differences between continental and oceanic eruptions; and types of emissions (viscous lava flow, pyroclastic flow, volcanic ash).

The sun is the source of energy that creates external forces on the Earth such as wind, rain, ocean waves, and rivers, which factor in the daily lives of all the world’s inhabitants. Internal & External Forces (V2518) discusses hydroelectric and wind power and looks at ocean waves, rivers and glaciers as forces of erosion. It describes an internal force, the volcano, its energy contained in and transported by molten rock, and the resulting massive transfer of energy. This 21 minute video also looks at how subterranean energy is tapped and geothermal energy is used.

Plate Tectonics (V2519) examines the mechanics and theory of plate tectonic activity encountered at plate boundaries/zones where earthquakes, volcanoes, faults, rifts, and rising mountain ranges are created. Topics included in this 21 minute video are the following: various plates (Oceanic, Eurasian), pillow lava, rifting event, subduction, Pacific Ring of Fire, differences in oceanic and continental volcanism, and core/mantle convection.

To borrow a copy of any of these videos, please call Rob at 604-528-5598 or send him a fax via 604-528-5593. Or if you prefer, send an e-mail message to rhoof@jibc.bc.ca or library@jibc.bc.ca.
